

Anticholinergic burden - High quality e-learning courses from PrescQIPP

Anticholinergic drugs are prescribed for a wide range of conditions, including Parkinson's disease, overactive bladder, chronic obstructive pulmonary disease, nausea and vomiting, depression and psychosis.

An increasing number of systematic reviews and meta-analyses report that drugs with anticholinergic effects are associated with an increased risk of cognitive impairment and all cause mortality in older people.

Course content

- This e-learning course has two modules, three case studies and a final exam with a 80% pass mark.
- Once the course is passed a certificate of completion will be issued.

MODULE 1

Side effects of anticholinergic drugs and the evidence base for cognitive impairment

MODULE 2

Anticholinergic burden risk scales

CASE STUDIES

Case studies of three individual patients with a high anticholinergic burden and examples of medication reviews.

How to buy and access the course

- The course costs £12.50 (+VAT)
- Purchase at the [PrescQIPP website](https://www.prescqipp.info)

Access the whole range of [PrescQIPP e-learning courses](https://www.prescqipp.info).

PrescQIPP is a not-for-profit company that provides robust, evidence-based resources to NHS and social care organisations to help improve medicines-related care for patients.
